## About

I am a recent graduate in Computer Programming and Analysis with three years of experience in Web Developing. I can help the company design, build, and customize responsive websites and applications. My goals are to challenge myself to keep up with the latest technology and improve my skills daily to accommodate the needs of my patrons. I have always been passionate about technology and how fast it has developed over the years, and how it helps individuals in their everyday lives. In today's day and age, businesses need a website or an app to operate more efficiently and effectively.

## Experiences

January Project  
2019

### Portfolio: Mcdeveloper.tech

This website is made with HTML5, CSS3, PHP, JavaScript/jQuery, Turn.js Library,

October 2019

### Test Portfolio: <http://test.mcdeveloper.tech/MCDad/>

This website is made with HTML5, CSS3, PHP, JavaScript/jQuery

Summer Intern  
2018

### Intern Software Engineer, Softdotcom.

The student learns to sharp his skills as a Computer Programming and Analysis, and during his intern the student was able to learn new platform and build a complete WordPress site "<http://coralmulticleaning.com/>".

2018-Present

### FedEx

As a FedEx delivery driver, this employee was able to further increase his attentiveness to his assigning tasks and driving while delivering packages, clearly communicate with the patron, and honestly delivered each package to their respective owner without mistake.
